

mother.

& the Motion Cookies

A family of simple and versatile connected sensors

Simply tell yourself “**this is what I need today, this is what I want**” and these magical sensors will adapt just as fast to take care of your current concerns.

Mother and her Motion Cookies are a unique solution to oversee all your daily needs: **health, fitness, comfort and much more**

Beautiful, simple, intuitive, flexible, infinite

Choose the SenseApp that corresponds to your current needs: *be fitter, protect my home, never forget my medication intakes*, and much more

Place a Cookie in the appropriate location: *in your pocket, on the front door, on your pill bottle, etc.* The Cookies analyse the movements of the object they are placed on, and send the data to Mother and to the Sen.se platform

Receive an alert or a reminder when an important event occurs: *someone is trying to break into your home! You forgot your medicine!*

Learn more about yourself, your activities and your environment: *did I beat my record of steps taken? When will we run out of coffee? What is the temperature in the baby's room?* Follow the details of your life on your Smartphone, tablet, or computer

Change your mind whenever you want. New needs, new desire? Simply choose another SenseApp from the list and move the Cookie to the new appropriate location

UNIQUE AND VERSATILE SENSORS FOR AN INFINITY OF USE CASES

Mother

- Connects to the Internet router through an Ethernet cable
- Communicates with the Cookies using the ISM band 868/915 Mhz radio frequency with a 20m/65ft range
- Sends the data to Sen.se's Cloud platform
- Manages up to 24 Cookies simultaneously
- Plays sounds and displays light animations when certain events occur

Motion Cookies

- 2.2in/5.5cm high, 0.6in/4mm thick, they can be easily attached to many different objects
- All Cookies are functionally identical and can be used with all of Mother's available SenseApps
- Contain an accelerometer and 7 smart and configurable algorithms used to detect different sorts of movements
- SmartMotion® technology helps them recognize the accurate activity and filter accidental or non significant movements
- Measure the temperature in a range of 0°F/-18°C to 120°F/ 50°C
- Constantly signal their presence to the closest Mother
- Seamlessly reconfigure to adapt to the SenseApp chosen by the user
- Work with a replaceable battery, which has an autonomy of up to 12 months
- Can stock up to 15 days of data when outside of Mother's range
- Can connect to any Mother within range
- The box of Cookies includes several accessories to help affix them on all sorts of surfaces

Senseboard

- Sen.se's Cloud Platform where all the data is collected, stored, and processed
- Secured account, only accessible by the user. No sharing of data
- Interface where the user can select the SenseApp he would like to use
- Dynamic dashboard that highlights what currently matters most in the user's life
- Detailed account of each SenseApp's data
- Sets off alerts depending on the user's preferences: Smartphone Notifications, text messages (add. fees), phone calls (add. fees), emails, sound notifications on Mother, Senseriver

Pocket Mother

- App for tablets and Smartphones
- Available on iOS, Android, Windows Phone and Windows 8
- Enables push and sound notifications from Mother's Apps
- Gives the ability to easily and rapidly pause an App
- Graphs and data visualization
- Dynamic visualization of the dashboard
- Fast and easy reconfiguration of Mother's Apps

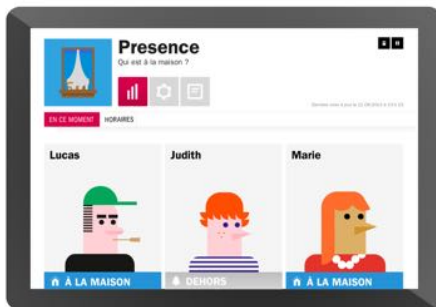

FIRST AVAILABLE APPS

Here are Mother's first SenseApps. Sen.se's open platform will allow third-party developers to use the Cookie's data to create new SenseApps and enrich the uses of Mother and her Motion Cookies.

All these SenseApps are entirely free.

Walk: in your pocket, the Cookie counts the number of steps and burned calories, and allows you to set personal goals and follow their development.

Presence: detects who's home. Did the kids make it home safely? Allows for a more effective heat management.

Medication: placed on a pillbox, the Cookie monitors medicine intake and sends a notification if the intake has been forgotten

Teeth: placed on a toothbrush, the Cookie indicates whether the brushing has been carried out properly.

Plants: attached to a watering can, the Cookie will send a notification if the plant has not been watered in a while.

Cartoon: when placed on a toy, the Cookie will set off cartoon sounds when the toy moves.

Sleep: placed on the mattress, the Cookie measures sleep quality and can set off the alarm clock at the best possible time.

Intrusion: placed on the door, the Cookie monitors door openings and alerts the user if an unusual activity has been detected.

Temperature: the Cookie measures the temperature of the location it's placed in, such as the baby's room, and can send alerts if the temperature is outside of a defined range.

Drink: a Cookie attached to your water bottle incites you to drink water regularly throughout the day.

Coffee: set on your coffee machine, the Cookie monitors your daily coffee consumption and can alert you when the capsule stock is running out.

Fridge: the Cookie sends a notification if the door of the fridge stays open. It also provides an opportunity to watch one's snacking.

Secrets: we all have our little secrets. The Cookie placed on the furniture or object you wish to protect alerts you if someone touches it.

PRODUCTS AND PACKS

Starter Pack Mother & 4 Motions Cookies

Bundle containing a Mother and a pack of 4 Motion Cookies.

Assembles the system's two components that are necessary to start using Mother.

Content

- A Mother
- An Ethernet cable
- An AC power adapter with a removable end piece. US or UK plug.
- Mother Quick Start Guide
- 4 Motion Cookies
- 5 batteries
- 3 silicone Cookie-holders
- 2 attachment straps
- 1 key string
- Sticky putty
- Cookie Quick Start Guide
- Cookie placement Guide

Pack of 4 additional Motion Cookies

Box of 4 Motion Cookies and their attachment accessories.

A Mother can manage up to 24 Cookies simultaneously. The user can buy additional Cookies to use even more applications.

Mobile Apps iOS (6.1+), Android (4.0+), and Windows Smartphones and tablets

Web All Apps can be accessed through a recent web browser on any device.

Mother

Dimensions Height 6.3in/16cm. Diameter 4in/10cm.

Weight 16oz/450gr

Operating conditions indoor use only

Certification FCC/CE. Radio standard 915/868 Mhz adapted for use in America/Europe

Network connection Wired Ethernet connection to Internet router or box

Radio Proprietary protocol in the 915/868 Mhz frequency band

Range 65ft/20m indoor, 165ft/50m in an open space

Cookies management 24 Cookies simultaneously

Power supply 100 to 240 V

Motion Cookies

Dimensions 2.2in x 1in x 0.6in / 5.5cm x 2.5cm x 0,4cm

Weight 0.2oz/6gr

Operating conditions not waterproof; must be kept away from splashes

Certification FCC/CE. Radio standard 915/868 Mhz adapted for use in America/Europe

Radio Proprietary protocol in the 915/868 Mhz frequency band

Range 65ft/20m indoor, 165ft/50m in an open space

Battery Replaceable CR2016 battery. Autonomy: up to 6 months when mobile, up to 12 months when sedentary

Memory The Cookie can store up to 15 days of data when away from Mother's range

Sensors 3D accelerometer, thermometer

Measured temperature 0°F/-18°C to 120°F/50°C
